Amendments to the Claims

1. (Currently Amended) A method ~~for~~ of reprinting at least one page ~~a portion~~ of a ~~previously~~ printed document, ~~the document including a plurality of pages,~~ the method comprising:

    printing a print job on a printer to generate the printed document;

    determining that at least one page of the printed document includes an error;

    instructing a user to load the printed document into an inserter tray on the printer;

    processing each page of the printed document from the inserter tray on the printer to an output tray on the printer by:

        determining if the page includes the error;

        if the page includes the error, then discarding the page, reprinting the page from the print job to generate a new page, and sending the new page to the output tray; and

        if the page does not include the error, then sending the page to the output tray.

    ~~(a) querying a user regarding the portion~~ having ~~, the portion including an erroneous page;~~

    ~~(b) instructing the user on loading a remaining portion of the document into an inserter tray associated with a printer;~~

    ~~(c) automatically reprinting the portion on the printer to provide a reprinted page for replacing the erroneous page; and~~

    ~~(d) automatically merging the reprinted page with the remaining portion by inserting the reprinted page from the inserter tray into the remaining portion.~~

2. (Currently Amended) The method of claim 1 wherein determining that the at least one page of the printed document includes the error further comprises: ~~the querying step (a) further includes the step of:~~

    [[(a1)]] querying the user as to whether an updated copy of the printed document is available.

3. (Currently Amended) The method of claim 2 further comprising:

[[(e)]] if the updated copy of the <u>printed</u> document is available, <u>then</u> automatically identifying the <u>at least one page having the error;</u> ~~erroneous page;~~

[[(f)]] if the updated copy of the document is not available, <u>then</u> allowing the user to identify the <u>at least one page having the error.</u> ~~erroneous page.~~

4. (Currently Amended) The method of claim 3 further comprising:

[[(g)]] determining whether ~~an~~ <u>the</u> error exists; and

[[(h)]] notifying the user of the error.

5. (Currently Amended) The method of claim [[4]] <u>1 wherein the error includes an update to the print job after printing the print job.</u> ~~further comprising:~~

~~(i) ejecting a portion of the remaining portion .~~

6. (Previously Presented) The method of claim 4 wherein the error includes a printer jam.

7. (Cancelled).

8. (Currently Amended) A system for reprinting <u>at least one page</u> ~~a portion~~ of a ~~previously~~ printed document, ~~the document including a plurality of pages,~~ the system comprising:

      <u>a printer configured to print a print job to generate the printed document;</u>

      <u>software configured to determine that at least one page of the printed document includes an error;</u>

      <u>a user interface configured to instruct a user to load the printed document into an inserter tray on the printer;</u>

      <u>the software further configured to process each page of the printed document from the inserter tray on the printer to an output tray on the printer and to determine if the page includes the error;</u>

      <u>the software, responsive to the page including the error, further configured to discard the page, reprint the page from the print job to generate a new page, and send the new page to the output tray; and</u>

      <u>the software, responsive to the page not including the error, further configured to send the page to the output tray.</u>

      ~~software for querying a user regarding the portion , the portion including an erroneous page, instructing the user on loading a remaining portion of the document, and for controlling the automatic reprinting of the portion to provide a reprinted page for replacing the erroneous page;~~

      ~~a printer for automatically reprinting the erroneous page; and~~

      ~~a tray in which the remaining portion is loaded the tray being associated with the printer and controlled by the software for automatically merging the reprinted page with the remaining portion.~~

9. (Currently Amended) The system of claim 8 wherein the software <u>is further configured to query</u> ~~further queries~~ the user as to whether an updated copy of the <u>printed</u> document is available.

10. (Currently Amended) The system of claim 9 wherein the software is further configured to identify ~~further automatically identifies~~ the at least one page having the error ~~erroneous page~~ if the updated copy of the printed document is available and ~~allows~~ to allow the user to identify the at least one page having the error ~~erroneous page~~ if the updated copy of the printed document is not available.

11. (Currently Amended) The system of claim 10 wherein the software is further configured to determine ~~further determines~~ whether ~~an~~ the error exists and to notify ~~notifies~~ the user of the error.

12. (Currently Amended) The system of claim 11 wherein the ~~one~~ error includes a printer jam.

13. (Currently Amended) The system of claim [[11]] wherein the error includes an update to the print job after printing the print job. ~~further comprising:~~
~~a post fuser inserter for retaining the remaining portion loaded by the user.~~

14. (Cancelled).
